Our products by application area contains nucleic acid labeling kits and reagents, nucleic acid hybridization kits and reagents, nucleic acid detection kits and reagents, and equipment. The nucleic acid hybridization kits and reagents section contains hybridization buffers, including ssc buffer and sspe buffer. If you are looking for equipment, we carry a variety of hybridization tubes, hybridization ovens and accessories. We also carry a wide range of products for random-primed labeling, nick translation, psoralen labeling, transcription labeling, and oligonucleotide labeling, to name a few. Be sure to check our new products list, which is updated frequently.</p>
